I find it difficult to believe Michael Hauge wrote this book. He is a master of structure and writes clear, crisp material. This book reads like an oral speech put on paper. Almost every paragraph has three lists in it as if the author was trying to reach every group at once. Hauge's excellent six step structure does work across various types of storytellers. I believe this time he was endeavoring to reach the advertising needs of entrepreneurs. Hauge's lists and interview questions are excellent. If something needs to be said in a book then say it (numerous asides) in parentheses are not needed. Where was the editor? This is a brilliant man, go to his website and read his previous work.
